Niilo Chair
Design: Allan Niilo

nienkämper

ICF group
The Niilo Chair, with its dramatic curves and contemporary elegance, is the culmination of advances in wood moulding technology. The chair is suitable for use in public spaces and private areas in commercial, institutional, and hospitality environments. Niilo’s arms, which extend downward in a continuous curve to form the chair’s legs, gently support the user’s arms in any position. Also, the sloping of the seat back allows for maximum comfort.

Seat and Back:
Cut soft polyurethane foam, wrapped in Fortrel® over a moulded plywood frame. Upholstered in leather, fabric and vinyl or a combination of contrasting colors or upholstery.

Frame and Base:
Moulded plywood, available in Maple, Cherry, or Walnut. Refer to Nienkamper’s Seating and Tables price list for wood finish details or visit www.nienkamper.com.
