

Pullman Sleeper Sofa™
Design: Nienkämper

nienkämper

The versatile, contemporary Pullman Sleeper Sofa is both practical and beautiful. Its solid frame allows for easy conversion from sofa to bed – without the hassles of cushion removal or elaborate unfolding that are the norm with heavier and bulkier sofa beds.

Seat and Back:

The upholstered seat and back are made of cut soft polyurethane foam core wrapped in Dacron®. The sofa can be upholstered in fabric, leather, vinyl, or a combination. Upholstery without tufting detail can be specified in fabric only.

Frame:

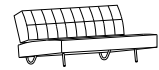

The frame is plywood/hardwood construction. This sofa has no hidden parts, and no additional hardware or components, such as springs, folding mechanisms, or removable mattresses and cushions. This design feature allows the piece to have a compact and contemporary design, while maintaining dual functionality.

Base:

The base is made of tubular steel and is available in a brushed nickel or polished chrome finish.

Measurements of the Sleeper Sofa used as a bed are: width 87" x depth 50" x height 16".

15701 Sleeper sofa - fully upholstered
